Brief Program Description & summary of overpayment causes and barriers to prevention:

Under the Medicare Advantage Program, also known as Medicare Part C, beneficiaries can opt to receive their Medicare benefits through a private health plan. Approximately half of all Medicare beneficiaries are enrolled in Medicare Advantage plans. The primary causes of overpayments are medical record discrepancies and insufficient documentation. Medicare Advantage Organizations are responsible for collecting and maintaining the documentation necessary to validate the data used in payment determinations. Medical records are not submitted to the agency at the time of making payment determinations.

Discussion of Actions Taken in the Preceding Quarter and Actions Planned in the Following Quarter to Prevent Overpayments

The Centers for Medicare & Medicaid Services (CMS) continued the implementation of the expanded payment year (PY) 2019 contract-specific Risk Adjustment Data Validation (RADV) audits of Medicare Advantage Organizations. Additionally, CMS issued reconsideration decisions for PY 2011, 2012 and 2013 RADV audits. We also issued audit findings for PY2014 and PY2015 RADV audits. Finally, CMS initiated PY2020 audits in an effort to continue to align with the May 2025 published press release to complete PY2018-PY 2024 audits on an expedited basis.
